MBAD-6161-U90--Human Behavior in Organizations

Mondays, 5.30-8.15
Center City Building, Room 901
Professor: Dr. Janaki Gooty
Email: jgooty@uncc.edu (best way to reach me).
Office Hours: By appointment. Just email me and we can set up a time either prior to class on Mondays at CCB or other times on the main campus.
TA: Information to be posted on Moodle.

Please check UNCC Moodle for regular updates.

Required materials:

2. Harvard case link is posted to Moodle.

3. RBSE can be purchased here: https://www.bus.umich.edu/Positive/Ecommerce/ecommerceform.asp?ProductID=108

Reading note. The readings indicated for a particular week should be read in advance of the class date. I will frequently post course material (e.g., power points for some class lectures; interesting articles from HBR etc) on the Moodle course website. Please check Moodle regularly. Course Schedule is posted to Moodle.

Course Description

From the UNCC Catalog: “Behavioral knowledge and skills essential to becoming an effective manager/leader including behavior and motivation in an environment of complexity and rapid change and ethical implications of actions and their effects on demographically diverse and increasingly international work force”

Course Objectives

The major objective of this course is to improve your effectiveness as a manager by providing you with a foundation of knowledge in topics including motivation, leadership, personality, and managing teams and to develop your ability to apply this knowledge to the solution of managerial problems. This course thus blends readings grounded in solid theory and research, class discussions focusing on real-world cases, examples from the popular business press, and exercises focusing on specific skills. An evidence-based approach to understanding and improving workplace health, well-being, and effectiveness, from an organizational behavior perspective, is emphasized.
Grading, Evaluation and Assignments

300 total possible points

Letter grades for the course will be assigned according to the standard formula: A = 100-90%, B=89-80%, C=79-70%, U = below 70%.

Quizzes

Quiz material will be drawn from assigned readings. They can be short-answer/multiple choice type questions. We will have 4 quizzes on the dates noted in the schedule.

Make-up quizzes will only be conducted for students under extraordinary circumstances (e.g., medical emergencies). All decisions regarding make-ups and exceptions, including what constitutes an ‘extraordinary circumstance’, fall completely under the discretion of the professor. Furthermore, for your situation to be considered for a make-up, you must contact the TA two weeks in advance (i.e., before the scheduled quiz).

Comprehensive Final Exam

Material will be drawn from assigned readings. They can be short-answer/multiple choice type questions.

Reflected Best Self Exercise

Will be fully discussed in class. The final deliverable here is a 10-page paper.

Key evaluation criteria
- Quality
- Thoroughness
- Writing
- Clarity of thought
- Integration of best-self stories

Students often want to know “What’s an A, What’s a B., etc.”. Although the criteria below are somewhat generic, this will give you a good idea of what I’m looking for when I assign an A, B, etc.

A/A+ Excellent work. Significantly exceeds assignment requirements; far above the norm for the class. Unique, insightful analysis is offered, shows strong critical thinking, integrates themes well. Writing nearly flawless. Action plan is insightful and practical.
A-/B+ Very good work. Provides insightful analysis and demonstrates critical thinking. Includes action plan.

B Good work. Fulfills requirements of the assignment.

B-/C+ OK work. Incomplete or inconsistent. Writing has some noticeable flaws.

C Minimally acceptable work. Does not fully follow instructions. Significant flaws in organization and writing. Meets minimal requirements for a passing grade.

C- and below. Seriously flawed product. Writing may have significant flaws.

Technical information: Typed, double-spaced, on 8.5 by 11 inch paper with 1 inch margins on all sides. Font should be 12-point Times New Roman. Violations of these rules will lead to grade reduction. It is also critical that the plagiarism rules out the end of this document are fully followed. Any paper submitted after the deadline will be penalized 25% of the grade for each day (24-hour period or fraction thereof) it is late.

**Participation**

A productive learning environment also requires comparable contributions of time, effort, and energy from the students. I expect you to come to class prepared to learn and participate. Note that effective participation requires preparation. I expect you to thoroughly read and analyze all assigned materials (i.e., chapter materials, case assignments, articles, etc.) prior to coming to class. Discuss readings and cases with other class members to develop your understanding.

Be prepared to:
1. Express your ideas and to evaluate recommendations that others provide.
2. Ask questions about material that you do not understand.
3. Find relevant experiences (potentially from your job/company) and share these with the class.
4. Develop responses to assigned questions prior to coming to class.
5. Actively participate during in-class group exercises.
6. Take responsibility for your in-class performance...think critically...be creative.
7. Behave in ways that create an effective and comfortable learning environment. This includes treating others with courtesy and respect, ensuring that cell phones are turned off or are on vibrate, arriving on time for class, and engaging in discussions that are direct but polite.
8. Have fun.

One caution: While you are expected to make informed contribution to class activities, understand that quality, not quantity alone, is valued. Students who speak frequently but rarely have anything of importance to say make very little contribution and in some cases, hinder class development. Many types of contributions are valued – e.g., presenting your insight into the facts...
of a case, suggesting cause-and-effect relationships among various events, anticipating the results of various actions, generating alternatives, or providing support for recommendations. Emotional or empathetic responses are also valued; they help to humanize discussions. Asking questions can be very helpful. Sometimes it is as important to recognize what is not known as it is to have a correct answer.

Beyond the steps outlined above, this also inherently requires listening to and respecting other people’s points of view (but by no means does this mean that you must agree with them). Indeed, debate is much appreciated and welcomed. Also, it does not mean that you should withhold questions for risk of looking stupid. Relevant questions are always a contribution. Quantity also plays a role here; your contributing to the discussion to help it move along is also recognized (and appreciated).

Additional Information

- Attendance Policy. Although I do not take formal attendance, regular attendance is mandatory. This class requires active participation. Often, we’ll have groups discuss a case or participate in an exercise in class; if you miss the class, you miss the learning experience.
- Should you miss a class due to illness, employment responsibilities, personal or family emergency, business or athletic team travel, you are responsible for getting missed notes from a classmate. Insert classmate emails here: ____________________, ____________________.
- Arrive to class ON-TIME and prepared.
- If you are having any problems at all, PLEASE go to the office hours.
- No electronic devices on during class-time without permission from the instructor.

THE UNC CHARLOTTE CODE OF STUDENT ACADEMIC INTEGRITY

The UNC Charlotte Code of Student Academic Integrity governs the responsibility of students to maintain integrity in academic work, defines violations of the standards, describes procedures for handling alleged violations of the standards, and lists applicable penalties. The following conduct is prohibited in that Code as violating those standards:

A. Cheating. Intentionally using or attempting to use unauthorized materials, information, notes, study aids or other devices in any academic exercise. This definition includes unauthorized communication of information during an academic exercise.

B. Fabrication and Falsification. Intentional and unauthorized alteration or invention of any information or citation in an academic exercise. Falsification is a matter of altering information, while fabrication is a matter of inventing or counterfeiting information for use in any academic exercise.
C. Multiple Submission. The submission of substantial portions of the same academic work (including oral reports) for credit more than once without authorization.

D. Plagiarism. Intentionally or knowingly presenting the work of another as one's own (i.e., without proper acknowledgment of the source). The sole exception to the requirement of acknowledging sources is when the ideas, information, etc., are common knowledge.

E. Abuse of Academic Materials. Intentionally or knowingly destroying, stealing, or making inaccessible library or other academic resource material.

F. Complicity in Academic Dishonesty. Intentionally or knowingly helping or attempting to help another to commit an act of academic dishonesty.

Academic evaluations in this course include a judgment that the student’s work is free from academic dishonesty of any type; and grades in this course will be adversely affected by academic dishonesty. Students who violate the code can be expelled from UNCC. The normal penalty for a first offense is zero credit on the work involving dishonesty and further reduction of the course grade. In almost all cases, the course grade is reduced to F.

Belk College of Business Statement on Diversity

The Belk College of Business strives to create an inclusive academic climate in which the dignity of all individuals is respected and maintained. Therefore, we celebrate diversity that includes, but is not limited to ability/disability, age, culture, ethnicity, gender, language, race, religion, sexual orientation, and socio-economic status.

Plagiarism (Thank you to Dr. Doug Pugh for constructing the below content)

Over the past several years I have noticed a growing problem with plagiarism at both the undergraduate and graduate level. When confronted, students have claimed either (a) ignorance as to what constitutes plagiarism, or (b) that they "just forgot" to include the appropriate citations. The purpose of this document is to make the meaning and definition of plagiarism perfectly clear by providing formal definitions and numerous examples. Its purpose also is to make you aware that this is an issue I take very seriously, and, as such, you should too as you prepare your formal written work for this course.

The material below is taken from the UNCC Code of Student Academic Integrity (on the web at http://www.uncc.edu/policystate/ps-105.html. This is a useful resource if you have any questions regarding plagiarism or other matters of academic integrity. However, the best way to get an answer if you are in any way confused is simply to ask me.

According to the UNCC Code of Academic Integrity: "Plagiarism is use of the distinctive ideas or words belonging to another person without adequate acknowledgement of that person's contribution. In the context of academic work the standards for acknowledging sources are very high. An author must give due credit whenever quoting another person's actual words, whenever
using another person's idea, opinion or theory, and whenever borrowing facts, statistics or illustrative material, unless the information is common knowledge". The two most common areas where plagiarism is an issue come in the use of direct quotations and in paraphrasing.

**Direct Quotation:** Every direct quotation must be identified by quotation marks or by appropriate indentation, and must be promptly acknowledged. The citation must be complete and in a style appropriate to the academic discipline.

**EXAMPLE:** The following is an example of an unacknowledged direct quotation:

Original Source: "To push the comparison with popular tale and popular romance a bit further, we may note that the measure of artistic triviality of works such as Sir Degare or even Havelok the Dane is their casualness, their indifference to all but the simplest elements of literary substance. The point is that high genre does not certify art and low genre does not preclude it." (From Robert M. Duran, Chaucer and the Shape of Creation, Howard University Press, 1967, p. 187.)

Student Paper: "To push the comparison with popular tale and popular romance a bit further, you can note that the measure of the artistic triviality in some works of Chaucer's time period is their casualness, their indifference to all but the simplest elements of literary substance. The point is that high genre does not certify art and low genre does not preclude it."

**Paraphrase:** Prompt acknowledgement is required when material from another source is paraphrased or summarized in whole or in part in one's own words. To acknowledge a paraphrase properly, one might state: "to paraphrase Locke's comment . . ." or "according to Rousseau . . ." and conclude with a citation identifying the exact reference. A citation acknowledging only a directly quoted statement does not suffice to notify the reader of any preceding or succeeding paraphrased material.

**EXAMPLE:** The following is an example of an unacknowledged paraphrase:

Original Source: "The era in question included three formally declared wars. The decision to enter the War of 1812 was made by Congress after extended debate. Madison made no recommendation in favor of hostilities, though he did marshall a telling case against England in his message to Congress of June 1, 1812. The primary impetus to battle, however, seems to have come from a group of War Hawks in the legislature." (From W. Taylor Reveley III, "Presidential War-Making: Constitutional Prerogative or Usurpation?", University of Virginia Law Review, November 1969, footnotes omitted.)

Student Paper: "There were three formally declared wars during this era. The decision to enter the war in 1812 was made by Congress after extended debate. Madison actually made no recommendation in favor of hostilities in his message to Congress of June 1, 1812, though he presented a persuasive case against Britain. The primary impetus to battle, however, appears to have come from a group of War Hawks in the legislature."
Both of the above examples are plagiarized because, in the student's papers, there is no acknowledgement given of the original authors. Reading the student paper gives the impression that those were his/her thoughts and ideas rather than those of the original author. That, in a nutshell, is the essence of plagiarism.

Here is an example of plagiarism from a student paper here at UNCC. The original article is "Determinants of Job Satisfaction of Municipal Government Employees" by Mark C. Ellickson and Kay Logsdon, in the journal State and Local Government Review. The first two paragraphs of the article are reproduced below.

ORGANIZATIONAL SCHOLARS have long been interested in why some people report being very satisfied with their jobs and others express much lower levels of satisfaction (Locke 1976). The drive to understand and explain job satisfaction has been motivated by utilitarian reasons (e.g., to increase productivity and organizational commitment, lower absenteeism and turnover, and ultimately, increase organizational effectiveness) as well as humanitarian interests (i.e., the notion that employees deserve to be treated with respect and have their psychological and physical well-being maximized). Satisfied workers also tend to engage in organizational citizenship behaviors; that is, altruistic behaviors that exceed the formal requirements of a job (Schnake 1991; Organ and Ryan 1995). Dissatisfied workers show an increased propensity for counterproductive behaviors, including withdrawal, burnout, and workplace aggression (Spector 1997).

Despite researchers’ and practitioners’ interest in job satisfaction among workers generally, few studies have sought to explain variation in job satisfaction among government employees, especially municipal employees, one of the fastest-growing sectors of the U.S. workforce. Over 11 million people……..

Now, look at the first two paragraphs of the submitted student paper.

Introduction

Job Satisfaction plays a central role in the study of behavior at work. It is one of the most widely discussed and enthusiastically studied constructs in Organizational Behavior. The drive to understand and explain job satisfaction has been motivated by utilitarian reasons (e.g., to increase productivity and organizational commitment, lower absenteeism and turnover, and ultimately, increase organizational effectiveness) as well as humanitarian interests (i.e., the notion that employees deserve to be treated with respect and have their psychological and physical well-being maximized) (Ellickson and Logsdon 2001). Satisfied workers also tend to engage in organizational citizenship behaviors; that is, altruistic behaviors that exceed the formal requirements of a job (Schnake 1991; Organ and Ryan 1995). Dissatisfied workers show
an increased propensity for counterproductive behaviors, including withdrawal, burnout, and workplace aggression (Spector 1997).

In this project, we studied a workgroup and measured its employees’ job satisfaction and dissatisfaction using Herzberg’s Two-Factor Theory. The scope of the project is to identify the motivator (satisfier) factors and the hygiene (dissatisfier) factors, analyze them and come up with the measurement. Criticism of the two-factor theory suggests that the research methodology looked only at satisfaction, not at productivity and that the relationship between satisfaction and productivity is assumed (Robbins 2003). As would be discussed in this paper, we also looked at productivity measured against, the workgroup’s goals and objectives to validate the assumption.

Make sure you understand why this is an example of plagiarism!! First, the student paper takes a direct quote from the article by Ellickson & Logsdon. Although they do include a reference at the end of the second sentence, the passage immediately before the reference should be contained in quotation marks, and a page number from the original source should be provided, because they have taken a direct quote from the original source. The most glaring offence, however, occurs in the 2 sentences following the Ellickson and Logsdon 2001 reference. There is nothing to indicate that the 2 sentences beginning "Satisfied workers also tend...." are anything other than the student's own work. The reader would assume that those thoughts and words were the student's original ideas; that the students had identified the articles by Schnake 1991, Organ and Ryan, 1995, and Spector, 1997, and reached conclusions based on those articles which they wrote in those two sentences. Of course, this is not true. The entire first paragraph is taken straight from the Ellickson and Logsdon article, but there is nothing to indicate this in the student submission.

I include this lengthy discussion because representing the work of another person as your own is serious business. Make sure you understand the basic rules outlined above. And if you have any questions, by all means just ask me. Because I go to great lengths to make this point clear, any instances of plagiarism will be dealt with according to the established rules of UNCC, and penalties may range from failure in the course to expulsion from the University. This is one area where I make no exceptions.
