Management 3280—Strategic Management
Spring 2015

Faculty: Dr. Karen Ford-Eickhoff (aka Dr. KFE)
Office: 342 Friday
Office Hours: By appointment; Monday and Wednesday 12:30-1:30 pm and 5:00 – 6:00 pm
Email: Karen.Ford-Eickhoff@uncc.edu (best way to reach me); please be sure to tell me in which course/section you are enrolled (i.e., day(s) and time your class starts) in your e-mail.
Phone: 704-687-7624

You will need to bring your text to class each day.

Required Cases: You will need to purchase an electronic case package for our class from the Harvard Business Publishing for Educators site at https://cb.hbsp.harvard.edu/cbmp/access/32205121. Click on the Register Now button and register as a student so you can access the coursepack I have set up for our course. You will need to have the case with you in class on the day it is discussed.

Highly Recommended: Wall Street Journal. The WSJ will provide valuable information in your business careers. For this course, articles from the WSJ will be the basis of one assignment and will be useful as well in class discussions for the participation component. The WSJ is available through the UNC Charlotte library while you are a student. If you want to get your own subscription at the greatly reduced student rate, you can go to http://www.wsj.com/studentoffer, enter 282 in the box where you are asked for the first three digits of the UNC Charlotte zip code, select UNC Charlotte from the drop-down list, and then select my name from the drop-down list as the referring professor. I will then confirm that you are a student so you can get the student rate.

Course Description:

MGMT 3280. Strategic Management. (3) Prerequisites: Senior standing; BLAW 3150, COMM 3160, ECON 3125, FINN 3120, INFO 3130, MGMT 3140, MKTG 3110, and OPER 3100. (Accounting majors are required to take BLAW 3150, COMM 3160, FINN 3120, INFO 3130, MGMT 3140, MKTG 3110, and OPER 3100 and earn a grade of C or above.) A capstone course that emphasizes the synthesis and application of concepts from the functional business courses so students develop an understanding of organizations from the perspective of top level executives. Focuses on the role of top management in leading, planning, and decision-making to form effective organizational strategies that integrate internal processes and the economic, technological, ethical, political, and social forces affecting the organization.

Assurance of Learning:

Decision/Analytical. Students will demonstrate analytical, quantitative, and reflexive thinking skills in decision making. Students will apply problem solving processes to business and economic situations.
Professional Competence/Synthesis. Students will acquire knowledge and analytical skills of the functional areas of business. Students will recognize, integrate, and synthesize frameworks from all
CATT Statement: All core courses in The Belk College of Business Administration are committed to fulfilling one or more of four major competency areas identified by the letters CATT: Communication and Technology Skills, Adaptability to Change, Globalization, and Diversity, Teamwork and Leadership, and Thinking and Problem Solving. In the Department of Management, MGMT 3280 is targeted at two of these learning outcomes: 1) Teamwork and Leadership and 2) Thinking and Problem Solving. The purpose of this course is to help students: function effectively as a team leader; to understand group dynamics; to think independently; to apply, articulate, and evaluate problem-solving processes; to recognize, employ, and integrate frameworks from all business disciplines in order to respond to opportunities and solve problems; and to cover ethical, global, and political issues in business.

Learning Objectives:
After completing MGMT 3280, students will:
• understand how to analyze the internal and external environments of business organizations in order to identify opportunities, threats, strengths, and weaknesses;
• be able to apply problem-solving processes to business situations;
• be able to recognize, integrate, and synthesize frameworks from all business disciplines to solve problems;
• understand the roles played by stakeholders in various business situations.

Course Objectives:
• To view the organization from the top management position;
• To apply a process of strategic thinking to solve organizational problems;
• To develop skills in strategic analysis;
• To increase awareness of ethical implications of decision making;
• To integrate knowledge gained from earlier prerequisite courses;
• To develop skills for integrating the functional areas such as management, marketing, finance, and production;
• To serve as a capstone course for the various business disciplines taught in the business core.

Purposes: The purposes of this course are: (1) to provide an integrative experience at the end of the bachelor's degree in business administration involving the key components of the business curriculum including such facets as accounting, finance, marketing, management, and management science; (2) to provide an opportunity for undergraduate students to place themselves in the role of chief executive officer and/or high level executives solving complex problems of major organizations in society--both private and public; (3) to analyze top corporate policy in different types of organizations; (4) to assume the role of business consultant; (5) to develop the student's capacity to think strategically about a company, its business position, and how it can gain sustainable competitive advantage; (6) to build students' skills in conducting strategic analysis in a variety of industries and to provide them with a stronger understanding of the competitive challenges of a global environment; and (7) to make students more conscious of the importance of ethical principles and corporate social responsibility. This course also attempts to encourage students to continue their study of top corporate policies, opportunities, and problems after leaving the university.

This capstone course is designed to transition students away from reliance on a professor lecturing to tell you what you need to know toward self-reliance and taking initiative—just like it will be in your careers from now on. And just like your careers, this course to a great extent will be what you make it.
The UNCC Code of Student Academic Integrity:
Students are reminded of the code of academic integrity stated in the college catalog and are expected to follow it. It reads as follows:

The UNC Charlotte Code of Student Academic Integrity governs the responsibility of students to maintain integrity in academic work, defines violations of the standards, describes procedures for handling alleged violations of the standards, describes procedures for handling alleged violations of the standards, and lists applicable penalties. The following conduct is prohibited in that Code as violating those standards:

A. Cheating. Intentionally using or attempting to use unauthorized materials, information, notes, study aids, or other devices in any academic exercise. This definition includes unauthorized communication of information during an academic exercise.

B. Fabrication and Falsification. Intentional and unauthorized alteration or invention of any information or citation in any academic exercise. Falsification is a matter of altering information, while fabrication is a matter of inventing or counterfeiting information for use in any academic exercise.

C. Multiple Submission. The submission of substantial portions of the same academic work (including oral reports) for credit more than once without authorization.

D. Plagiarism. Intentionally or knowingly presenting the work or another as one's own (i.e., without proper acknowledgment of the source). The sole exception to the requirement of acknowledging is when the ideas, information, etc. is common knowledge.

E. Abuse of Academic Materials. Intentionally or knowingly destroying, stealing, or making inaccessible library or other academic resource material.

F. Complicity in Academic Dishonesty. Intentionally or knowingly helping or attempting to help another to commit an act of academic dishonesty.

Diversity:
The Belk College of Business strives to create an inclusive academic environment in which the dignity of all individuals is respected and maintained. Therefore, we celebrate diversity that includes, but is not limited to, ability/disability, age, culture, ethnicity, gender, language, race, religion, sexual orientation, and socio-economic status.

Disability and Impairment Accommodation:
If you require course adaptations or accommodations because of a disability, or if you have emergency medical information about which I should be informed, please speak with me as soon as possible. Students who require accommodations must work with the Office of Disability Services (704.687.4355). Students are responsible for notifying me of any conditions that may impair their academic performance for which reasonable accommodation can be made.

Method of evaluation:
Exams                  35%
Team term project     25%
Class participation   15%
Written assignments   15%
WSJ article(s) summary/presentation  10%
Grading scale:

A : 90-100
B: 80-89
C: 70-79
D: 60-69
F: < 60

Exams: The course includes two written exams and a comprehensive final exam. The comprehensive exam will be the only make-up exam opportunity if you miss an earlier exam. The two highest exam grades will be used to calculate the exam component of the course grade.

You should be in the classroom and ready to begin the exams at the beginning of our classtime. You will not be able to start an exam if you arrive more than five minutes after the beginning of our classtime. All electronic devices must be shut down and put away at the beginning of class. You should strictly abide by the UNCC Code of Student Academic Integrity in terms of preparing for and taking exams (and in all matters pertaining to this course). If your behavior raises suspicions that you are not abiding by the Code of Academic Integrity (including for example such behaviors as attempting to see a classmate’s answers, placing your answers where a classmate can see them, completing a form of the exam other than your assigned form, etc.), I reserve the right to not grade your exam, resulting in a zero for that exam.

Team Term Project: A major component of the course will be a term project in which students will analyze an existing company. Students will research and analyze the current situation for your firms, develop and evaluate strategies for the future, and recommend and support a course of action. As a team, students will present your research and recommendations in class as well as submitting a full written report.

Your grade will be based on my assessment of your contribution to the project as an individual and as a team member. Much of the work you do for this project may be completed on your own, but the final presentation should be a team product in every sense. In addition to my assessment of your work, a portion of your grade will be based on your self-evaluation and peer evaluations by members of your team. Not completing the assigned peer evaluations will reduce your own peer evaluation score for each evaluation you do not complete.

So that everyone will have the same amount of time to prepare the team term project, the team term project papers will be due the same day for all teams. Everything included in your team presentation must also be included in your team paper. The remaining portion of the course will then be devoted to these major team presentations.

You must complete all three components of the team term project (i.e., the paper, the presentation, and the peer evaluation) to be eligible for any credit for the term project component of the course grade.

When you are the audience for your classmates’ team presentations, you should analyze what they present from the perspective of a business executive and offer substantive comments and suggestions. All students are expected to be conscientious organizational citizens and attend all team term project presentations. Your overall grade will be reduced one percent for each presentation missed during these major presentations at the end of the semester.
Class Participation: Your organizations will expect you to make valuable contributions as you perform your jobs. If graduate school is next for you, you will be expected to be prepared and engaged in class. Similarly, class participation is essential in this course. In order to participate fully, you should read all assigned textbook chapters and cases and be well prepared to discuss them in class. You should be aware of the major stories in the Wall Street Journal in order to apply these current events to topics discussed in class. The primary focus of classtime will be for you to apply and integrate concepts you have learned about throughout your undergraduate program.

When you are the audience for classmates doing individual or team term project presentations, you will earn credit by participating in discussions with the presenters and the rest of the class.

Participation of course begins with being in class so absences mean you miss the opportunity to earn participation points that day. I will give everyone a base of points equivalent to one week “off” during the semester, similar to annual leave or sick leave in organizations, so there are no “excused” absences beyond this and no need to provide documentation about the reason for your absence. Arriving late for class or leaving early will reduce the participation points earned that day by one category. Both the quantity and quality of your participation is important for earning participation points each day on the following scale:

- Exceptional (8 points)—contributions show exceptional preparation. Ideas are exceptionally substantive and provide major insights. Positions are persuasively presented while respecting others’ positions as well. Superior contribution to the quality of the discussion.

- Full participation (4 points)—contributions show good preparation. Ideas are substantive and provide generally useful insights that offer direction to the class. Positions are satisfactorily persuasive while respecting others’ positions as well. Significant contribution to the quality of the discussion as expected in a senior level, capstone course.

- OK (2 points)—contributions show some preparation but not good preparation. Ideas are less substantive and provide few insights that add to the class. Positions are adequately persuasive while respecting others’ positions. Some contribution to the quality of the discussion.

- Present but no contribution (1 point)—present in class but no contributions or contributions show no preparation. Ideas are not substantive and provide no benefit to the class. Positions are not persuasive or are presented in a manner that is not respectful of others’ positions. No contribution to the quality of the discussion.

- Absent (0 points)—absent from class

You will have ample opportunity to earn participation points over the semester since nearly every class meeting will involve an opportunity to participate. I use four points (full participation) as the total points available. Since night classes equate to two day classes combined, I use four points for each half of a night class. At the end of the semester the proportion of 100 total points that you have earned will be used to calculate the participation component of the course grade. Note that with exceptional quality participation every day, it is possible to earn more than 100 points on the participation component. So your strong participation in the class discussions has a positive impact on your overall course grade as well as on the quality of class discussions.
Written Assignments: Written assignments will give students the opportunity to individually reflect on a variety of issues and develop written communication skills. Written assignments will sometimes be completed during class and sometimes outside of class time. Late assignments will not be accepted.

Your written work will be assessed on the following scale:

- Exceptional (8 points)—exceptionally thorough and well written (choice of words, grammar, punctuation, organization, etc.). Ideas are exceptionally substantive and provide major insights. Positions are presented in an exceptionally persuasive manner. Superior quality of written expression.

- Meeting expectations (4 points)—thorough, well-written, and shows good preparation and organization. Ideas are substantive and provide substantial insights. Positions are presented in a persuasive manner. Meets expectations in terms of the quality of written expression in a senior level, capstone course.

- OK (2 points)—less thorough and shows less adequate preparation. Ideas are less substantive and provide few insights. Positions are less persuasive. Does not meet expectations in terms of the quality of written expression in a senior level, capstone course.

- Unsatisfactory (0 points)—not submitted or not submitted before the due date and time.

I use four points (meeting expectations) as the total points available for each written assignment. Again note that with exceptional quality work on written assignments it is possible to earn more than 100% on the written component of the course grade.

Wall Street Journal Article(s) Summary: Summarizing articles from the Wall Street Journal on topics related to strategic concepts in business will emphasize current events and applications of textbook concepts in the real world. Individually, students will present your summaries of the articles in order to share the information with classmates and develop your oral communication skills. These presentations give all students the opportunity to lead the class discussion on topics you find interesting and also to speak in front of the class once before the major term project presentations later in the semester.

You will submit your written summary and a pdf file of the original article(s) to Moodle by the deadline on the schedule AND bring a paper copy to me by the beginning of class the day your presentation is due in order to be eligible to do your presentation. No points will be available on this component of the course unless you both turn in the written summary by the due date/time and present your summary.

Electronic devices: All students must turn off and put away all electronic devices such as cell phones and laptops while in the classroom during class. Talk with me if you would like to use a laptop/tablet to view electronic versions of the cases rather than printing them (and only for this purpose) during class. Your participation component for the course will be negatively impacted by distractions you cause or allow.
**Schedule:** Note that this schedule is subject to change. If the due date differs on Moodle2, this schedule takes precedence.
