Management Information Systems

Instructor: Dr. Ram Kumar
Office: 203B Friday
Phone: 704.687.7649
Email: rlkumar@uncc.edu

Course Description
The course is designed to introduce students to the use of Information Systems (IS) as an essential tool for conducting business in an increasingly global economy. The emphasis is on the conceptual foundations underlying the design, control and operation of IS and how IS provide organizations competitive advantages.

Learning Objectives
Managers today have increasing responsibility for determining their own computer based information systems (IS) needs and for designing and implementing information systems that will support their decision making. Thus, the objectives of this course include the following:

1. To be familiar with the IS terminology used to support business.
2. To gain critical thinking skills needed to solve business problems with IS.
3. To develop an understanding of IS, their conceptual and technical foundations, users, components, missions, and capabilities.
4. To get acquainted with both conventional, as well as state-of-the-art, information technologies and to understand how to apply them to support management decision making.

Course Materials
- Other material posted on CANVAS.

Excel Assignment– 20 points extra credit

Note: Regular attendance will earn you at best 70% of the class participation grade. Active participation is required for a higher grade.
The final letter grade will be calculated based on the following scale:
A: 900 and above; B: 800-899 C: 700-799; D: 60-699; F: Below 600

The course grades are posted on CANVAS for informational purposes only. The official overall grade is computed and kept in the instructor’s gradebook.

Exams: Four equally weighted exams will be given in this course: Three during the semester plus a comprehensive final. However, only THE HIGHEST THREE of the exams will be counted towards the grade. Students may take all four exams and drop the one with the lowest grade.

Assignments: Students must complete the following individual assignments during the course of the semester.

- Application assignments: Use of Microsoft Access, and IBM SPSS Modeler to facilitate business decision making. There may be an extra credit Excel Assignment. We will have computer labs for these assignments. These assignments must be submitted on CANVAS by the due date.

Group Project: Students will form groups (3 members) to complete and present the project.
All members in a group are expected to contribute to the project. If a group member does not contribute, the rest of the members may, after a consensus agreement and the instructor’s consent, ask him/her to leave the group. The maximum project grade for students not belonging to a group will be a B. Peer reviews may be requested and factored into the grade.

Instructions:

a. Topic Choice: Submit Topics via CANVAS with name of group members (each person must submit a Word document even if you are in a group) by the deadline. If you are not in a group, submit an individual topic choice and I will assign you to a group and topic (you may not get the topic of your choice). Submit up to three ranked choices. The topics will be assigned on a first come first choice basis. Groups that do not submit a selection by the due date will be assigned one.

b. Class Presentation
   i. The presentations will be scheduled for the first 10-15 minutes of class (We may have multiple presentations on some days). The presentation schedule will be determined by the instructor.
   ii. Each group must submit their presentation file via CANVAS by noon of the day before the presentation.
   iii. Include as part of your presentation, 1 multiple choice questions that can potentially be used on an exam. (The instructor may or may not use them)
   iv. All sources must be cited on the individual slides where the material appears. In addition, one of the last slides must contain a complete list of sources.

c. The grade will be based on the:
   i. Quality of the research
      a. accuracy and up-to-datedness,
      b. discussion of issues from a business point of view,
      c. quality of sources
The goal of the presentation is for students to research an interesting information technology that is used in business or an interesting aspect of the use of technology (such as Internet Addiction) and make a brief presentation (up to 4 slides including links to videos and excluding references and exam question). You can play part of a video or the whole video. Below are some of the topics that you may be interested in. You can select one of these topics are to come up with your own topic (check with me for approval).

Electronic currencies and payment systems (Bitcoin and others)
Robot financial advisors (wealthfront, betterment,...)
Business (or consumer) applications of robots
IBM Watson applications in finance
IBM Watson applications in Healthcare
How does IBM Watson work?
What is Kickstarter? How does it work
Self-driving cars
New types of social networks (besides Facebook, LinkedIn...)
Internet Addiction
Website Analytics
Twitter Analytics
Big Data Applications
Business applications of drones
Predictive Analytics
Healthcare Analytics
What technologies does Netflix Use?
What technologies does UBER use?
What data can websites collect about me?
Internet advertising (present some examples of companies and what they do)—examples—Doubleclick, Quaero,...
Other Class Policies

Attendance and Participation Policy
Attendance and participation are required. Attendance may be taken at any point during the class (beginning, middle, end) and may even be checked multiple times. Tardiness or early departure are disruptive and are, of course, discouraged and will be reflected in the attendance grade as absences. Absence from a class session also implies zero participation for that session.

I expect every student to study the textbook and other posted materials (notes, solutions, etc.) prior to each class session. Students must be prepared to answer questions on the “current” topic. Discussion questions and quizzes may be used to evaluate preparation/participation and the results will be combined with the attendance record. Small homework assignments may be given during the semester and will also count towards class participation.

Students will be held responsible for any material covered, announcements made, assignments passed out, and any other type of work that they may miss during any absence from class.

Exams
Make-up exams will NOT be given except in cases of serious medical emergencies as evidenced by a written doctor's excuse. Permission must be obtained from the professor prior to the scheduled exam time. Students missing an exam with an approved excuse will be allowed to make up the exam with the professor's approval during the final exam period. There will be no make-up for the comprehensive final.

Exam reviews will be available during office hours or by appointment for one week after exam grades are posted.

Exams are a form of intellectual property belonging to those who create them. Consequently, exams must remain in my possession or under my control at all times. This means that exams may not be taken out of the room or copied. Students are encouraged to review their exams during office hours or by appointment. However, failure to return an exam after taking or reviewing it or removing an exam from my presence at any time or copying an exam will be considered theft of intellectual property. Such action will result in an exam grade of zero and may warrant further disciplinary action.

Assignments
This 3-credit course requires three hours of classroom or direct faculty instruction and six hours of out-of-class student work each week for approximately 15 weeks. Out-of-class work may include but is not limited to: required reading, library research, written assignments, and studying for quizzes and exams.

You must complete each individual assignment on your own. Any sharing between students will be considered a violation of the Academic Integrity Code and will result at a minimum in a grade of zero for the assignment with a possibility for further disciplinary action.

Group Work
Peer reviews for all group work may be requested

Due Dates Policy
IT IS EXPECTED THAT STUDENTS WILL TURN IN ALL ASSIGNMENTS ON TIME. Late assignments will not be accepted, and you will receive a zero for that assignment.

Class Behavior Policy
Disruptive behavior distracts the instructor and other students and negatively impacts their in-class learning. Such behavior includes but is not limited to arriving late, leaving early, having side conversations, making unnecessary comments that add no value to the class, surfing the net, and any activities that negatively impact the ability of other students to learn and/or listen in class.

Disruptive behavior could result in lower or negative class participation grades.

Electronic Devices in Class
Use of computing, communication, or other devices during the class time for purposes other than those required for the purposes of the class is prohibited. This includes the use of laptops, lab computers, phones or other devices for Internet browsing, game playing, reading news, emailing, texting, chatting, IM, Facebook, or other activities not required for the class.

Use of cellular phones, pagers, music players, radios, and similar devices is prohibited in the classroom and laboratory facilities. Cellular phones and other communication devices must be turned off during class, except in cases of medical emergencies.

Except in emergencies, those using such devices may be asked to leave the classroom for the remainder of the class period. Students are permitted to use computers during class for note-taking and other class-related work only. Those using computers during class for work not related to that class may be asked to leave the classroom for the remainder of the class period.

Grade Appeals Policy
If you believe that the grade you received on an assignment or an exam was in error or unfair, you can appeal to the professor in writing within 7 calendar days after the grades are posted. The appeal should clearly state the reasons why you believe the grade to be unfair or the nature of the error. Overdue appeals will not be considered.

Academic Integrity
As a program that helps to create business and government leaders, the College of Business has an obligation to ensure academic integrity is of the highest standards. Standards of academic integrity will be enforced in this course.

University regulations will be strictly enforced in all cases of academic irregularities, cheating or plagiarism. Students assume full responsibility for the content and integrity of the academic work they submit. The guiding principle of academic integrity shall be that a student’s submitted work, examinations, reports, and projects must be his/her own work.

All UNCC students have the responsibility to be familiar with and to observe the requirements of The UNCC Code of Student Academic Integrity (see the Catalog and also http://integrity.uncc.edu/). This code forbids cheating, fabrication or falsification of information, multiple submission of academic work,
plagiarism of written materials and software projects, abuse of academic materials (such as library books on reserve), and complicity in academic dishonesty (helping others to violate the code). Additional examples of violation of the Code include:

- Representing the work of others as your own.
- Using or obtaining unauthorized assistance in any academic work.
- Giving unauthorized assistance to other students.
- Modifying, without instructor approval, an examination, paper, record, or report for the purpose of obtaining additional credit.
- Misrepresenting the content of submitted work.

Students are expected to report cases of academic dishonesty they become aware of to the course instructor who is responsible for dealing with them.

For this course, it is permissible to assist classmates in general discussions about the homework. General advice and interaction are encouraged. Each person, however, must develop his or her own solutions to the assigned homework and laboratory exercises. Students may not "work together" on graded assignments. Such collaboration constitutes cheating, unless it is a group assignment. A student may not use or copy (by any means) another's work (or portions of it) and represent it as his/her own. If you need help on an assignment, contact your instructor or the TA, not other classmates.

Any further specific requirements or permission regarding academic integrity in this course will be stated by the instructor, and are also binding on the students in this course. Students who violate the code can be punished to the extent of being permanently expelled from UNCC and having this fact recorded on their official transcripts. The normal penalty is zero credit on the work involving dishonesty and further substantial reduction of the course grade. In most cases, the course grade is reduced to "F."

If you are unclear about whether a particular situation may constitute an honor code violation, you should meet me to discuss the situation. Feel free to discuss the definition of cheating and/or plagiarism with me if you are unclear on these terms or have questions about the acceptability of a particular type of action.

The instructor may ask students to produce identification at examinations and may require students to demonstrate that graded assignments completed outside of class are their own work.

**Disability Accommodations**
If you have a disability that qualifies you for academic accommodations, please provide a letter of accommodation from the Office of Disability Services during the first week of class. For more information regarding accommodations, please contact the Office of Disability Services at 704.687.4355 or stop by their office in 230 Fretwell.

**Diversity**
The Belk College of Business strives to create an inclusive academic climate in which the dignity of all individuals is respected and maintained. Therefore, we celebrate diversity that includes, but is not limited to ability/disability, age, culture, ethnicity, gender, language, race, religion, sexual orientation, and socio-economic status.
Incomplete Grade Policy
Receiving a grade of incomplete ("I") is not based solely on a student's failure to complete work or as a means of raising his/her grade by doing additional work after the grade report time. An incomplete grade can be given only when a student has a serious medical problem or other extenuating circumstance that legitimately prevents completion of required work by the due date. In any case, for a student to receive an 'I' grade, the student's work to date should be passing, he/she must have completed a significant portion of the course, and the student must provide proper written proof (e.g., a doctor's note) of the extenuating circumstances.

Course Changes Policy
The instructor reserves the right to make any necessary changes to the course content, schedule, and policies.

<p>| Tentative Class Schedule (Changes May be Made at the Discretion of the Instructor) |
|-----------------|-----------------|-----------------|
| Date            | Topic                        | Assigned Reading | Due Dates                     |
