You might enjoy economics if you enjoy challenging the status quo; you have superb math skills; you enjoy finding connections among ideas; you can see the big picture; you rely on research and data to make decisions; you’re always asking “what if..?”

UNEMPLOYMENT IS AT ITS LOWEST SINCE THE 1960s. In 2017, the stock market set record highs. Economic analysts predict that the economy still has room to expand during this growth period of the economic cycle, creating many opportunities for graduates with education and experience in economics.
